

**Amendments to the Specification:**

Please add the following new paragraph after paragraph [0004]:

[0004.1] In one aspect of the invention a surgical navigation system includes a surgical navigation array having a body and a plurality of tracking elements mounted to the body. The position of at least one tracking element is adjustable to produce alternate spatial arrays of tracking elements.

Please replace paragraph [0005] with the following paragraph:

[0005] In another aspect of the invention, a surgical navigation system includes means for tracking a spatial pattern of a predetermined number of tracking elements. An array body includes a plurality of tracking elements attached to it and a number of tracking element attachment locations greater than the number of tracking elements. The plurality of tracking elements is attachable to the array body in alternate predetermined spatial configurations by attaching the tracking elements to different subsets of the tracking element attachment locations.
